EC DECLARATION OF CONFORMITY

in accordance with the EU Machinery Directive 2006/42/EC
applicable as from December 29th 2009:

HE-VA ApS
N. A. Christensensvej 34,
DK-7900 Nykøbing Mors

hereby confirms that the following machine has been manufactured in accordance with the Council
Directive 2006/42/EC.

The declaration comprises the following machine:

HE-VA Front-Roller 1.5 / 2.6 / 3.0 / 4.0 m (rigid)
and
4.0 / 5.0 / 6.0 m (hydr.)

Nykøbing the 29th December 2009

A handwritten signature in black ink, appearing to read 'Villy Christiansen', is written over a horizontal line.

Villy Christiansen

The undersigned is furthermore authorised to compile technical documentation for the above
machine.

Delivery Check

Upon delivery to the dealer/supplier as well as to the customer, check the Front-Roller for possible damages.

Machine Description

Range of Application

The Front-Roller is a front-mounted roller for land packing in connection with preparation of the seedbed and seeding with combi-harrow, rotor-harrow, tine rotary cultivator etc. The Front-Roller may be applied on all types of soil, however, is suitable for light and medium-heavy soil types.

The Front-Roller is mounted in the front-lift of the tractor. If the Front-Lift is equipped with double-acting hydraulics, it is possible to transfer weight from the tractor onto the Front-Roller. In order to achieve optimum control in connection with the transfer of the weight from the tractor to the roller, the Front-Lift should be equipped with spring suspension in order to achieve a flexible connection between the tractor and the roller. Furthermore, the tractor should be with four-wheel drive.

As extra equipment, the Front-Roller may be equipped with Front-Harrow and/or Spring-Board as well as carriers for additional weights.

	1,5 m	2,6 m	3,0 m	4,0 m	4,0 m Hydr.	5,0 m Hydr.	6,0 m Hydr.
<u>Technical specifications</u>							
Working width	1,50m	2,60m	3,00m	4,00m	4,00m	5,00m	6,00m
Total width	1,73m	2,66m	3,08m	4,17m	4,3 m	5,21m	6,22m
Transport width	1,73m	2,66m	3,08m	4,17m	2,70m	2,80m	2,97m
Length	1,29m	1,29m	1,29m	1,61m	1,61m	2,00m	2,00m
Height folded					2,00m		2,83m
Weight without extra equipment:							
Cambridge rings, Ø45cm/18"	485kg	790kg	900kg	1280kg	1430kg	1675kg	2010kg
Cambridge rings, Ø51cm/21"	615kg	930kg	1060kg	1505kg	1655kg	1955kg	2348kg
Cambridge rings, Ø62cm/24"	760kg	1160kg	1330kg	1875kg	2025kg	2345kg	2820kg
Cross-kill rings, Ø48/53cm	550kg	730kg	830kg	1210kg	1360kg	1590kg	1905kg
V-profile ring 600mm	570kg	850kg	970kg	1385kg	1535kg	1805kg	2170kg
Additional weight – double frame	42kg	42kg	42kg	78kg			
Oil outlet	1 double-acting outlet on 4.0m – 5.0m - 6.0m hydr.						
Maximum weight transfer from the tractor	800kg						
Noise level	under 70 dB (A)						

Extra equipment	2,6 m	3,0 m	4,0 m	4,0 m Hydr.	5,0 m Hydr.	6,0 m Hydr.
Additional weight – Front-Harrow	158kg	177kg	254kg	275kg	330 kg	397kg
Additional weight – Spring-Board	185kg	205kg	260kg	460kg	515 kg	570kg
Oil outlet - Spring-Board	1 double-acting outlet at the front of the tractor					

The Front-Roller complies with DS/ISO 8759/2, Front – Three-Point suspension (cat. II).

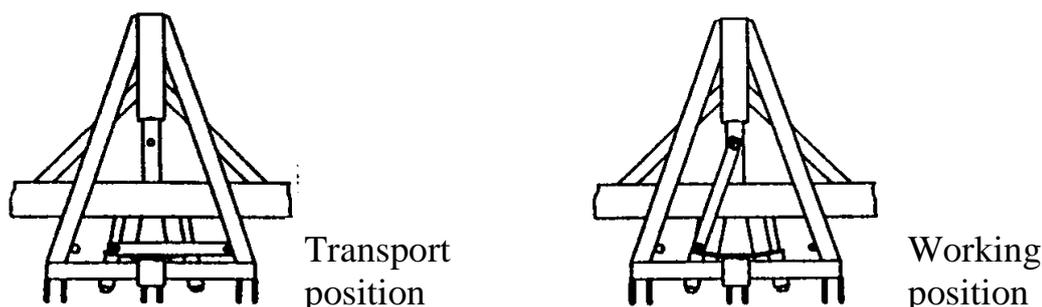

Distance between the lift arms (balls) is 870 mm

Operating Instructions

Start-up

Front-Roller

During transport the Front-Roller frame is locked in relation to the top frame. Before starting the work, the locking bar must be moved from transport position to working position.

- When the locking bar is in working position, the roller will be self-steered and thus following the tractor.
- In working position, the roller must be horizontal in the direction of driving.
- In sharp turns, e.g. in connection with turning at the ends and reversing, the Front-Roller must be lifted.
- When the roller is mounted in a HE-VA Front-Lift with spring suspension, the following applies:

When transferring weight from the tractor onto the roller, you will get the best combination of packing and control when the Front-Lift manometer shows 35 – 60 bar (depending on the weight of the tractor).

Front-Harrow

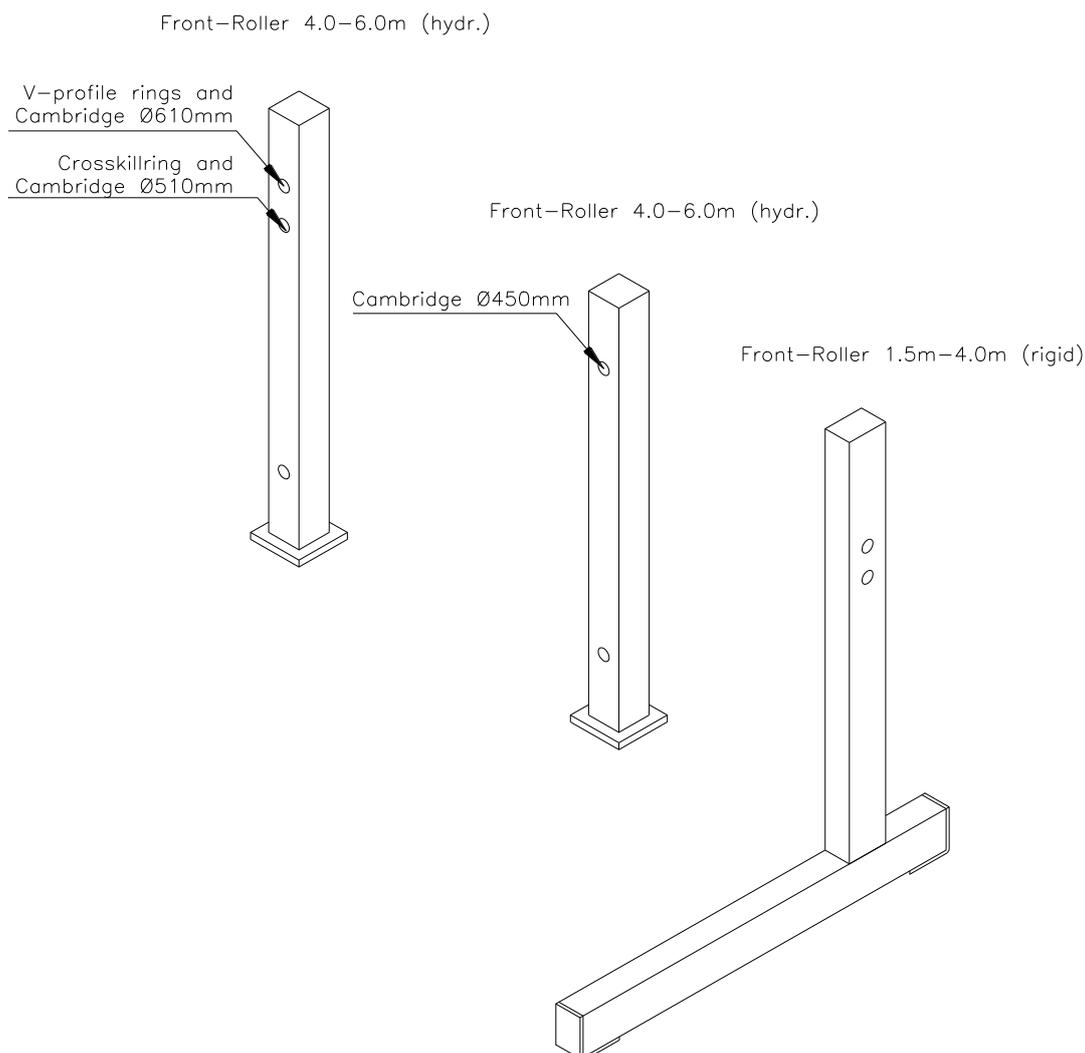

Before adjusting the working depth, make sure that the roller runs horizontally. The two spindles must be synchronised, i.e. one spindle may as a maximum be turned 5 turns before the other spindle is turned the corresponding number of turns in the same direction. For each turn of the handle, the front-harrow is lifted/lowered 5 mm.

Spring-Board:

The Spring-board requires a double-acting oil outlet at the tractor. The tine angle is hydraulically controlled from the driver's cab, and the depth control is made manually. The tines work independent of each other, however, they may be connected by means of a transverse locking system (extra equipment), if a greater levelling effect is required. The change-over is made easily and quickly without any tools.

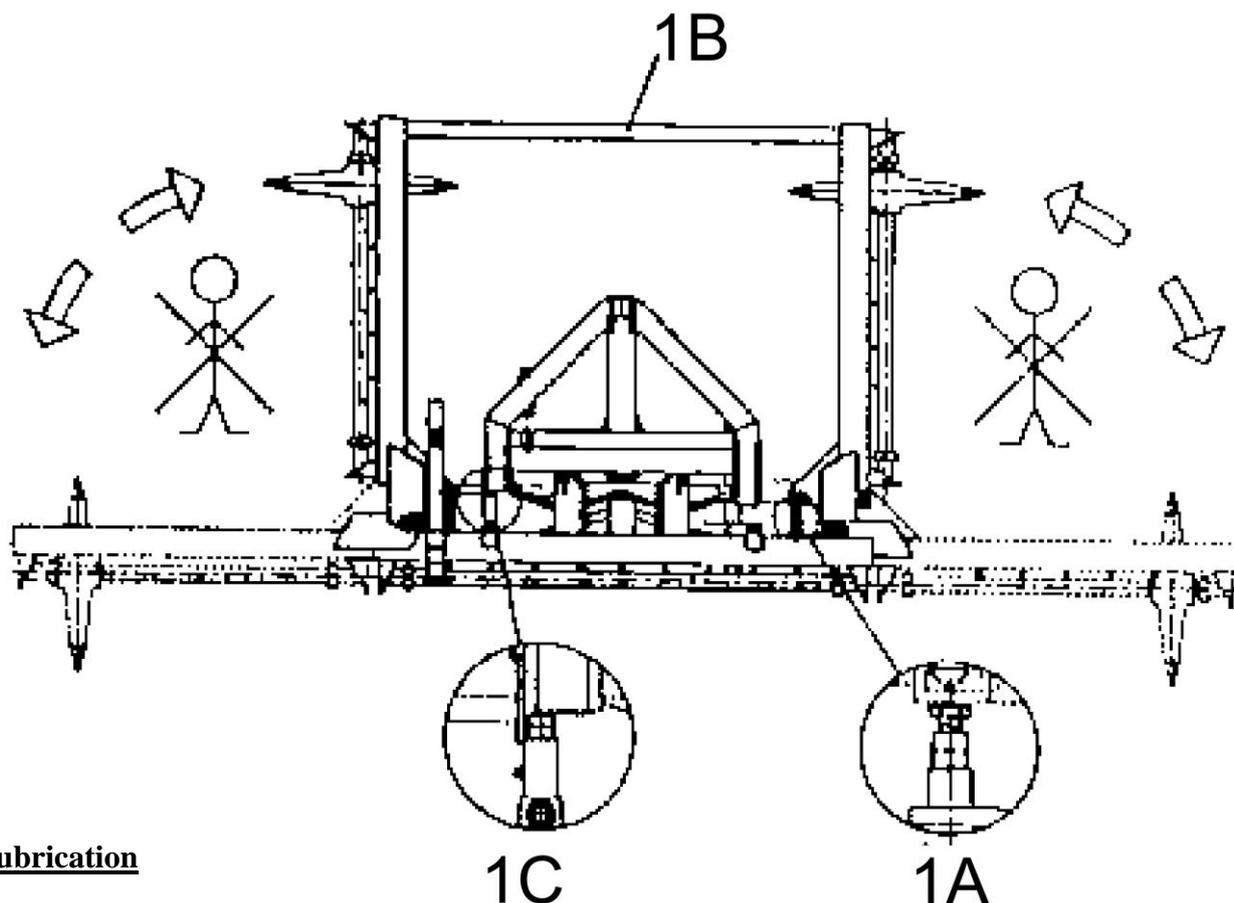

Uncoupling and coupling

The Front-Roller is equipped with supporting legs which must be lowered when the machine is uncoupled. Before uncoupling, a possible mounted Spring-Board must be lifted, and the hydraulic system is to be de-pressurized. Furthermore, the Front-Harrow must be lifted so that the weight of the Front-Roller does not rest on the tine of the harrow but on the supporting legs.

Transport (hydraulic machines)

For transport, the wing sections are to be lifted. The bolts at the cylinders are to be adjusted so that the wing sections are vertical (fig. 1A). Hereafter, the mechanical locking bar (fig. 1B) is to be mounted for reasons of failure in the hydraulic system. Moreover, the built-in transport lock must be locked, to prevent the roller from swaying around during transport (fig 1C).

Lubrication

Front-Roller

For lubrication, maintenance and repair, the tractor must be braked and the motor stopped. The Front-Roller is to be lowered or supported properly so that it cannot fall in event of failure in the front-lift's or the tractor's hydraulic system. For lubrication of the hydraulic Front-Rollers, the wing sections have to be lowered or the mechanical locking bar has to be mounted in lifted state (see fig. 1B).

The 1.5 – 3.0 m Front-Rollers (rigid) have 4 lubrication points, the 4.0 m rigid Front-Rollers have 6 lubrication points, the 4.0 m hydraulic Front-Rollers have 14 lubrication points and the 6.0 m hydraulic Front-Rollers have 16 lubrication points. All Front-Rollers must be lubricated after every 10 working hours as well as after the cleaning in order to press out any water and dirt. The lubrication points are located at ball bearings, supporting rollers and cylinders.

Note!

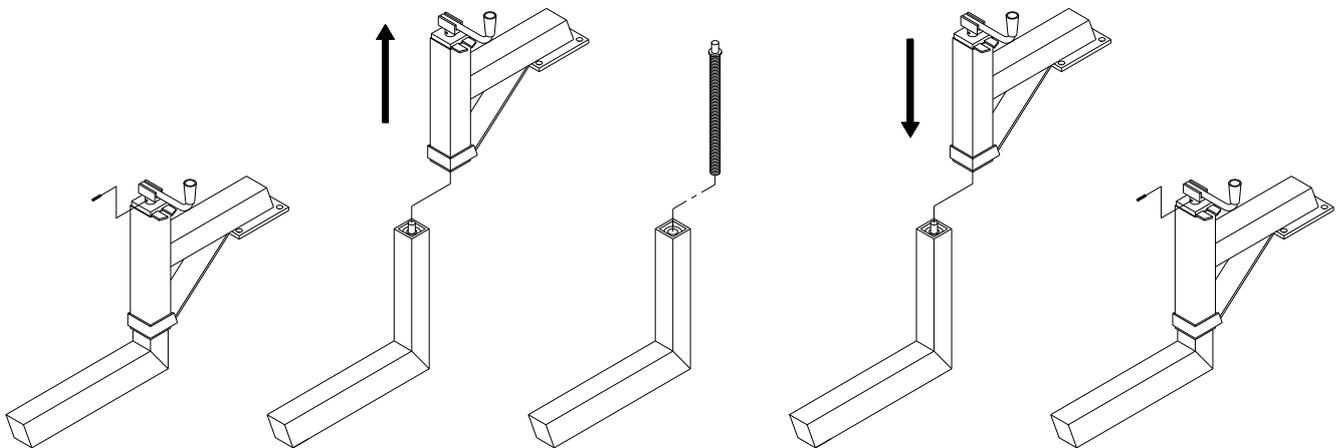

However, the double-sealed ball bearings should only be lubricated every 20 working hours and by 1-2 strokes so that the sealing rings are not pressed out.

Front-Harrow

The Front-Harrow's spindles are not equipped with lubricating nipples. Once a year, e.g. when the season is over and the machine is stored for the winter, the spindles should be dismantled and lubricated with ball bearing grease.

Note!

Before dismantling the Front-Harrow, the harrow points should rest on the support, otherwise the harrow will fall down when the roll pins are knocked out.

Roll pins are knocked out.

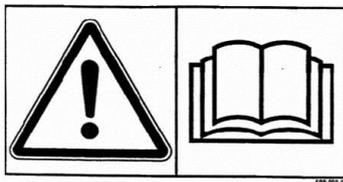

Consoles are lifted.

Spindles are screwed off, lubricated and screwed in again.

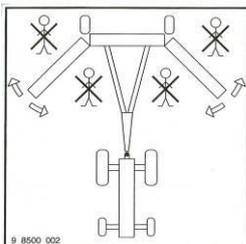

Consoles are lowered over inside part.

Roll pins are knocked down again.

Safety – and other markings on the machine

Study the Operating Instructions thoroughly before any operation of the machine and observe all safety instructions.

Take care that no persons are within the machine's hazardous area during the unfolding and folding procedure..

Plate with number and year of manufacture

**HUSK - PLEASE NOTE -
ACHTUNG - ATTENTION**
EFTERSPÆND BOLTE
TIGHTEN UP THE BOLTS
BOLZEN NACHZIEHEN
RESSERRER LES BOULONS

Tighten up the bolts regularly. If this is not performed, our warranty obligations will no longer apply.

Maximum torque in Nm. w/lubricated thread			
Metric thread	Quality 8.8	Quality 10.9	Quality 12.9
M12	81	114	136
M14	128	181	217

M20	385	541	649
M22	518	728	874
M24	665	935	1120

Maintenance

The entire machine

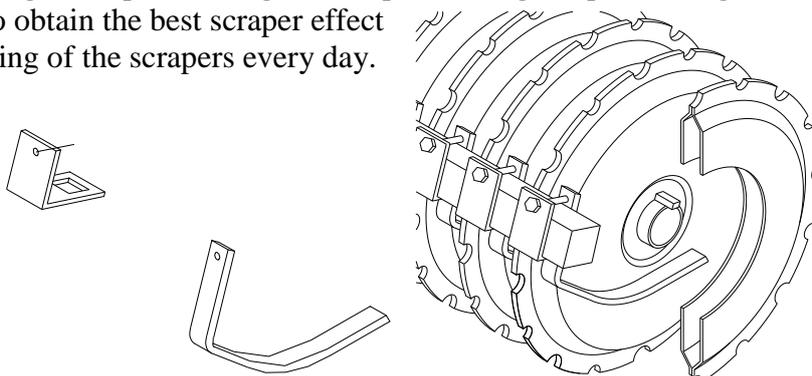

- After the first 10 hours of operation, tighten up all bolts.
- Further check on a regular basis that all bolts are tightened.
- Before the winter storage, wash and lubricate the machine. If you use high-pressure cleaner, do not spray directly on the ball bearings. After the washing, you may spray the machine with oil.
- Check regularly that all rings are whole and that there are no stones jammed in the rings.

Front-Harrow/Spring-Board

Turn/replace the points before the harrow tines show signs of wear.

Scrapers

The Front-Roller with V-profile rings has special designed scrapers among the packer rings. To avoid unnecessary wear and to obtain the best scraper effect it is important to check the centering of the scrapers every day.

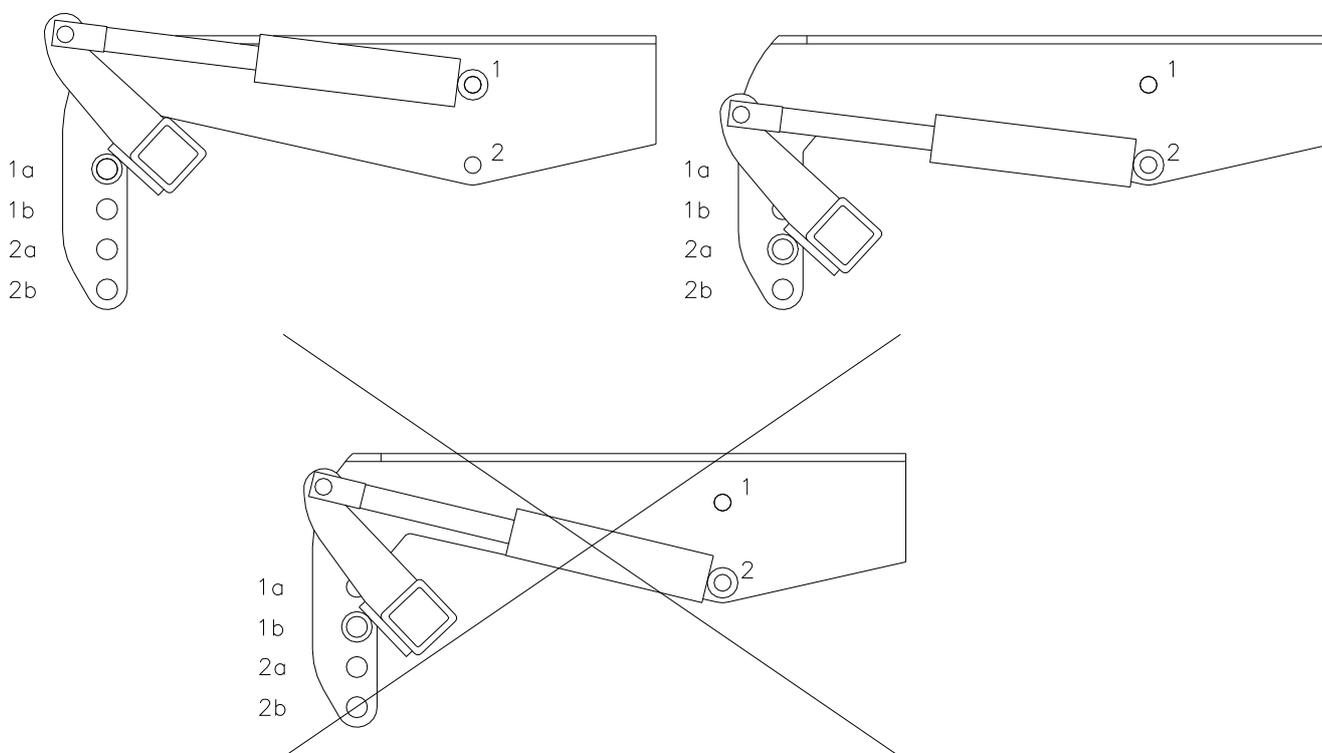

Spring-Board

Mounting of cylinder on Spring-Board

The hydraulic cylinders are mounted as shown in the below figure. It is important to have them correctly mounted in order to get the correct moment on the cylinders.

The ring type determines whether the cylinders must be mounted in hole 1 or hole 2. If the machine is equipped with 450 or 550 mm rings, the cylinders must be fitted in hole 1 and hole 1a or 1b. If the machine is equipped with 620 mm rings, the cylinders must be fitted in hole 2 and hole 2a or 2b.

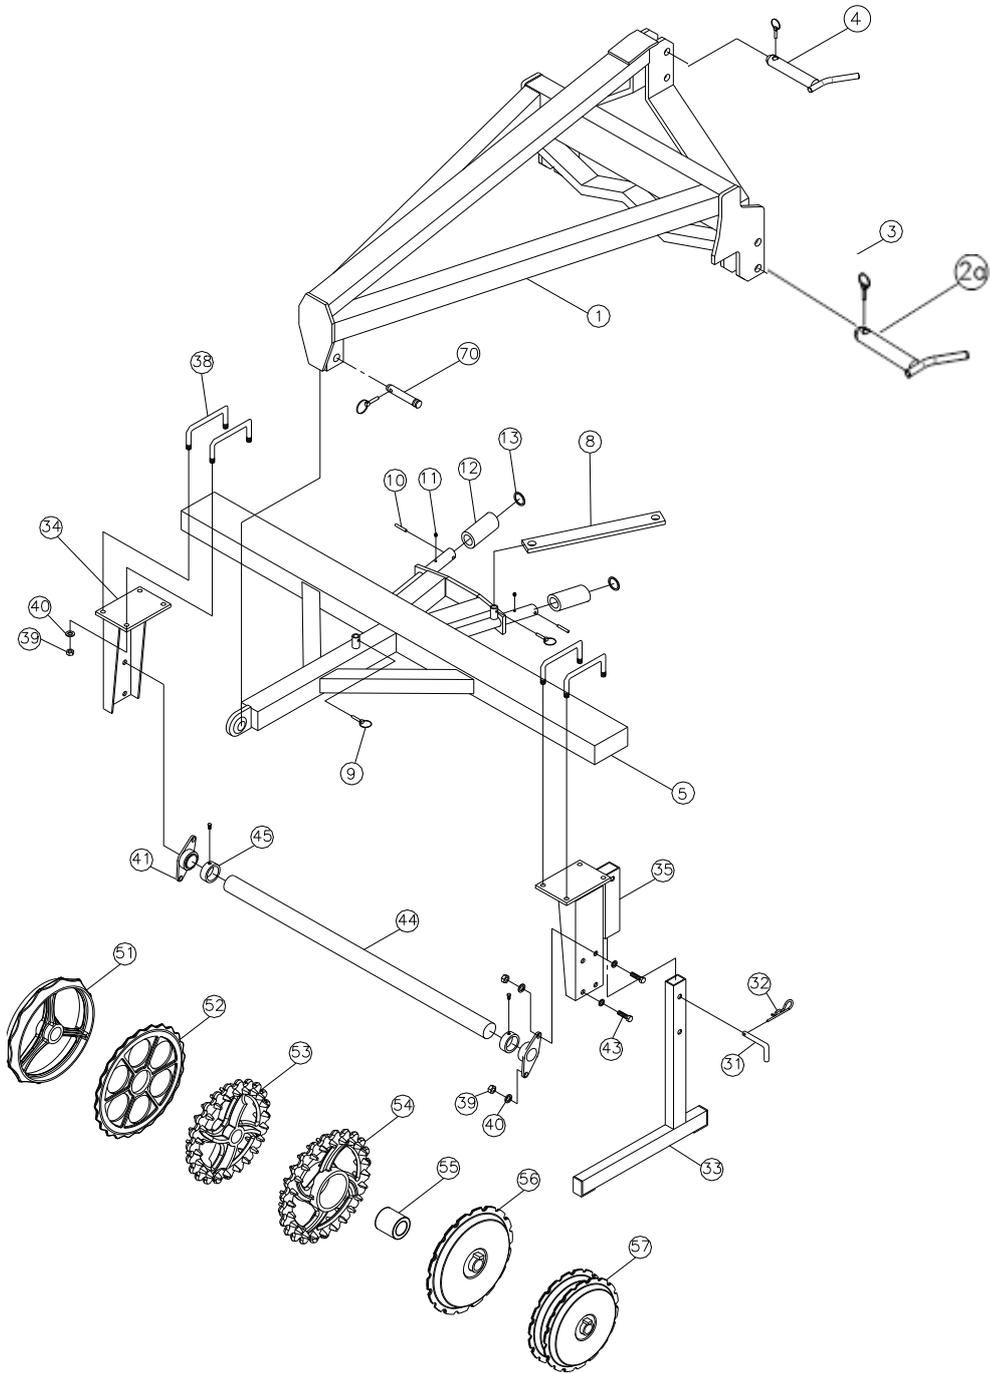

Retromounting of Front-Harrow and Spring-Board

Both the Front-Harrow and the Spring-Board can be mounted directly on the frame. If the Front-Roller is to be mounted with both a Front-Harrow and Spring-Board, a double frame is necessary. Spring-Board is to be mounted on the front bar and the Front-Harrow on the rear bar.

Note: Check number and measurements of all cables before ordering the spare parts

Weight carriers

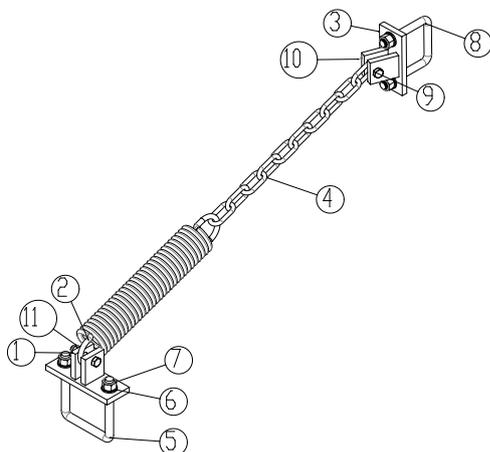

Pos.	Item no.	Designation	Qty.
1	634400400	Stand	2
2	690110102	U-bolt M16x80x160x80	4
3	690117013	Facet plate Ø16	8
4	690113008	Self-locking nut M16	8
5	690117005	Facet plate Ø20	4
6	690112009	Nut M20 (lock nut)	4
7	634400401	Clamping plate	4
8	690113009	Self-locking nut M20	4
9	630400601	Threaded rod M20 L = 500 mm	2

Stone boxes

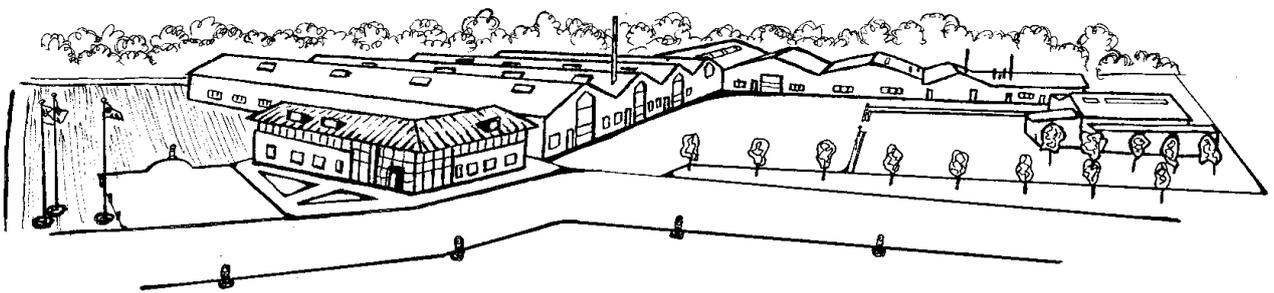

Pos.	Item no.	Designation	Qty.
1	630555004	Stonebox, left	1
1	630555006	Stonebox, right	1
1	630555005	Set of stonebox, incl 4 pcs. U-bolts M16x100x150x100	
2	690110103	U-bolt	4
3	690113008	Self-locking nut M16	8
4	690117013	Facet plate Ø16	8

Stabilization device

Pos.	Item no.	Designation	Pr. machine
1	670860010	Bracket for wing-section	2
2	690139001	Spring	2
3	670860005	Bracket upper	2
4	670860006	Chain	2
5	690110101	U-bolt M16x100x100x100	2
6	690117013	Facet plate Ø16	8
7	690113008	Self-locking nut M16	8
8	690110107	U-bolt M16x80x80x80	2
9	690103095	Bolt M12x60 8.8	4
10	690117014	Facet plate Ø12	4
11	690113006	Self-locking nut M12	4
